SBANGMILANO

New YorkCity Neighborhoods map with QGis, LeafletJS e PostGIS

Sono 5 le "città" che formano New York City e ognuna di esse ha avuto un passato urbanistico diverso che ha portato all'evoluzione di questi Neighborhoods in modo radicale con i propri abitanti. Manhattan con a sua volta divisa in Upper, Middle, Down, rimane il punto di riferimento per tutti, ma solo insieme agli altri 4 Neighborhoods, New York City fa la differenza rispetto a tutti gli USA. Neighborhoods:

- Manhattan
- Brooklyn
- Queens
- The Bronx
- Staten Island

Technical notes: this map was created with QGis and the data stored in a Postgres / PostGIS database. Web publishing, on the other hand, uses
